

student desiring more darkroom equipment is expected to provide it himself. Another darkroom, equipped by the photography instructor, may be open to qualified students who prove themselves capable of taking care of precision equipment.

Photography students are expected to bring their own cameras, and provide their own materials such as film, paper, and chemicals. The College owns a 5 x 7 view camera which may be used by qualified students.

Although the College has a 16mm sound movie projector, students who wish to concentrate on movie photography are expected to bring their own movie camera.

MUSIC

The music department has a studio with piano, radio, and phonograph, as well as a library of musical scores and 400 albums of phonograph records. The College owns six grand pianos and two upright pianos. There are additional music practice rooms, including the Music Cubicle.

PHYSICS AND CHEMISTRY

A new building is under construction to replace the one which burned in 1948. Meanwhile, there is a small and modestly equipped laboratory room in the Studies Building.

PRINTING

The print shop contains two job presses with thirty type cases and complete accessories. Equipment is sufficient for printing most of the smaller publications of the College and serves, also, in publishing many individual works of students and faculty.

STUDIES

Each student and faculty member has a private room in the Studies Building which he uses for an office or studio.

WEAVING

There is a large weaving room in the Studies Building, completely equipped with eight hand looms of various types and accessory items.

Harriet Engelhardt Memorial Collection of Textiles

From a gift given by parents in memory of a former weaving student, Anni Albers, former weaving instructor, built up a fine collection of textiles. The collection is comprised of Mexican, Guatemalan, and Peruvian weavings with some additional pieces from Sardinia, Italy, the South Seas, and Africa. The collection is of such nature that it may be sent out on special loan to museums.

THE FARM

Approximately 200 acres of the College property are used for pasture and crop land. Roughly 300 more acres, under the same management as the farm, consists of economically productive forest land. The farm is excellently equipped with modern buildings and is almost
